## RBD-S1 Spike Protein (SARS-CoV-2) His Tag Recombinant (HEK293 Expressed) Biotinylated

Code	00706-06-50B
Name	RBD-S1 Spike Protein (SARS-CoV-2) His Tag Rec. (HEK293) Biotinylated
Lot No.	
Size	50 µg
Source	HEK293
Tag	6x His Tag on C-terminal
Purity	>95% in SDS gel
Formulation	100µl per well of 0.5 µg/mL of S1-Spike Protein
Carry	0.05% BSA
Storage	2- 8 ° C
Protein ID	YP_009724390.1
MW	40 KD in SDS-PAGE Gel (due glycosylated)

### Description

SARS-CoV-2 Spike Protein is composed of S1 domain and S2 domain. S1 contains a receptor-binding domain (RBD) that can specifically bind to angiotensin-converting enzyme 2 (ACE2), the receptor on target cells. RBD-S1 Spike Protein (SARS-CoV-2) His Tag recombinant (HEK293 derived) has a predicted molecular mass of 30 KDa. Due to glycosylation, the recombinant RBD-S1 Spike Protein (SARS-CoV-2) His Tag migrates as an approximately 40 kDa band in SDS-PAGE under reduce condition. This protein was conjugated with Biotin and dialysis in PBS.

### Receptor ACE2 Binding Test

This RBD-S1 Spike Protein (SARS-CoV-2) His Tag recombinant (HEK293 derived) Biotinylated (00706-06-10B) had been tested by the human soluble ACE2 Fc Fusion (HEK293) pre-coated microplates. Its EC<sub>50</sub>= 50-100ng/mL.

### Formulation

Lyophilized 50 µg of the Biotinylated RBD-S1 Spike Protein (SARS-CoV-2) His Tag (HEK293) in 200 µl of PBS (130mM NaCl, 7mM Na<sub>2</sub>HPO<sub>4</sub>, 3mM NaH<sub>2</sub>PO<sub>4</sub>, pH 7.4). Carry is 0.05% BSA.

### Reconstitution & Storage

Add 200 µl Deionized Water to the vial to prepare a working stock solution at 100 µg/mL. Allow to set at least 30 minutes at 4° C, mix well.

Store lyophilized protein at -20° C or -70° C. Lyophilized protein is stable for up to 6 months from date of receipt at -20° C to -70° C. Upon reconstitution, this protein can be stored at -20° C for a few days or at -70° C in a manual defrost freezer for long term storage (1 month).
